

CONCEPT

The DMP230 is a MP3 file player and FM Tuner designed as an audio source for commercial sound systems. It sports intuitive use, excellent audio quality and the added value of an in-built jingle player with scheduling. On the MP3 side, file replay in all bitrates is available, and the file name (not the tag) is shown on an 8-digit clear-text display. File/folder navigation is simple and does not interrupt replay while navigating. The FM tuner includes RDS station name readout and provides storage for 9 preset stations. Last but not least, the jingle player allows

to insert jingles (like advertisements, etc.) either at the touch of a button or in certain time intervals into the running program. The large LCD display provides clear status information and read-out of MP3 file names and RDS station names. Being part of the DM series of digital media modules, this unit comes with all required hardware to use it stand-alone or mount it into a 19" rack. Optional hardware to combine it with another DM series module to become a 19"/1U assembly is available.

FEATURES

- Media player/tuner for USB thumbdrives/SD cards up to 16GB/2000 songs
- FAT32 file system
- File/Folder navigation with single sub-folder structure
- MP3 Replay in all bitrates (no other file formats supported)
- MP3 file name readout on large LCD display (no MP3 tag display)
- Regular and random play sequence
- Elapsed/remain time mode
- FM tuner mode with RDS station name display
- 10 self-programmable radio station presets. Note: this unit does not provide any auto-scanning of the FM frequency range to avoid accidental overwriting of station presets by unauthorized users.
- Jingle player with up to 3 jingles and additional scheduled play mode with programmable time intervals
- IR remote for media player transport functions, FM stations and volume control
- Balanced (XLR) and unbalanced (RCA) output
- Output level setting on rear panel
- FM antenna male-male adaptor included
- Internal symmetrical power supply for excellent dynamics
- AC mains voltage selector switch 115/230V
- All-metal case with brushed aluminum front panel
- Rack-mount set for single unit rackmounting (compatible with all DM series products) included
- Double unit rackmount set optional (not included)
- CE/ROHS compliant

TECHNICAL DATA

Frequency response.....20Hz – 20 kHz
AC IN (EU setting).....AC220-250V~ 50Hz
AC IN (US version).....AC110-120V~ 60Hz

Power consumption.....max. 10W
Dimensions.....W185.0xH44.5xD130.0mm
Weight.....0.9 kg
